MVP

Hand & surface cleaning dispenser

simple

The multi-functional and stylish Sanitex® MVP system combines a next generation dispenser design with high quality soap and surface cleaners, promoting good hand and surface hygiene.

Complete with advanced foam, liquid and spray cartridges, the Sanitex® MVP system consists of a range of manual and automatic versions, robust & reliable units that are beautifully simple to operate & service. Each is available in a choice of white, chrome or transparent windows to compliment any environment.

Incorporated into this range is our professional surface care system designed to significantly reduce the amount of harmful bacteria on surfaces.

tested quality

Every part of our system, formulas, pumps, bottles & dispensers are rigorously tested & monitored for trouble free performance.

As the most crucial component of our soap system the pump has been designed to withstand thousands of activations. The simplicity of the engineering allows this durability to be incorporated into a cost effective, sealed, disposable cartridge.

Each pump goes through a series of automated robotic tests. After a pump passes all the tests, the data is recorded & a unique identification number is assigned & printed on it's side.

All Vectair Systems pumps are engineered & tested for a trouble free performance each & every time.

*Sanitex® MVP Automatic with bright chrome window.

design

dispenser

- Choice of manual or “touch free” automatic dispenser available with optional colour inserts to match decor (white, transparent or bright chrome).
- Biomaster® antimicrobial protection incorporated into the dispenser cover (manual option only) - independently tested and proven to reduce bacterial growth by 99.99%. Improves hygiene and safety for users. (See page 13 of this document for further information).
- Dispensers measure 10cm / under 4” deep & operate with less than 5 lbf (pounds of force). Complete with full ADA compliancy.
- Large optional sight window makes it easy to monitor when refills need replacing.
- A thoughtful backplate design covers most dispenser footprints eliminating extra wall drill holes, time consuming repairs & aids quick installation.
- Fully recyclable ABS material.
- Optional key lock for added security.
- Unique lock out design on dispenser secures refill business.

*Sanitex® MVP Manual with bright chrome window.

Sanitex®.mvp dispensers are available in white, transparent and chrome colour options.

• Drip Tray (dispenser accessory)

Prod. Code:
MVP10070 (Fits all versions)

Material:
Charcoal Glass Filled Polypropylene

*Sanitex® MVP Manual Surface dispenser with white window & fitted with an optional drip tray.

antimicrobial

Biomaster® is a safe, effective and permanent antimicrobial technology. This broad spectrum antimicrobial additive incorporated into Sanitex® MVP cover becomes an integral part providing durable, lifelong antimicrobial protection.

Based on silver ion technology, Biomaster® Protection has been proven to be highly effective at reducing the growth of microbes. Independently tested to ISO standards to ensure effectiveness against bacteria associated with critical markets such as the Healthcare & Food Hygiene.

SAFE
Based on proven silver ion technology.

EFFECTIVE
Independently tested and proven to reduce bacterial growth by 99.99%. Successfully tested against over 50 common organisms such as MRSA, E.coli, Salmonella, Listeria, Pseudomonas and Campylobacter.

PERMANENT
Built into Sanitex® MVP manual products to last for its active lifetime.
